

Advanced Training in
Medical Massage
THERAPYEDU.NET

Say goodbye to the ordinary.

Advance into true evidence-based soft tissue manipulation to get results where others fail.

Learn the art of delivering drug-free pain relief and improving people's lives as a recognized Specialist in Medical Massage.

**For all practicing therapists
wanting to go beyond basic
relaxation as a recognized
healthcare provider.**

**Medical massage and spa massage
serve different purposes with
different focuses.**

**While spa massage is primarily
designed for relaxation and
pampering, medical massage is
focused on addressing specific
medical conditions and promoting
healing.**

**Keep reading to see what's
different about
Medical Massage:**

1. Targeted Treatment:

Medical Massage is designed to address specific medical conditions or injuries, such as chronic pain, muscle tension, or rehabilitation after an injury.

It involves a more focused approach and uses specific techniques to target and alleviate the underlying issues.

2. Expertise and Training:

Medical massage therapists undergo specialized training and have a deeper understanding of anatomy, physiology, and pathology.

They possess knowledge and skills to assess and treat specific conditions, ensuring a more effective and tailored treatment approach.

3. Integration with Healthcare:

Medical massage is often provided within a healthcare setting or in collaboration with healthcare professionals.

This integration allows for better coordination of care, communication between the massage therapist and other healthcare providers, and a comprehensive approach to addressing the patient's needs.

4. Treatment of Underlying Causes:

Medical massage aims to address the root causes of pain or dysfunction rather than simply providing temporary relief.

By focusing on the underlying issues, it can help to promote long-term healing and improve overall well-being.

5. Elite Therapists

Of course spa massage has its benefits; relaxation, stress reduction, and general well-being.

And, as a Specialist in Medical Massage, you can bring so much more to the table.

Our program is dedicated to maximizing the fullness of the outstanding health care service you can provide your clients and community.

One Fundamental Change Can Change Everything!

Never again say:
"Undress to your comfort level"

Our Clothed-Client approach is refreshingly different from the norm.

This one fundamental difference cascades into a wide set of very specific and meaningful benefits to both you and your clients.

Keep reading for just 5 of them:

Dare to be different!

THERAPYEDU.NET

1) Deliver treatment as part of a professional, interactive dialog.

Rather than zoning out to Pachabel's Canon, you'll learn how to engage your clients in an interactive dialog that allows you to target treatment most effectively and keep your pressure just right.

Engaged clients are more likely to respect you and perform at home the remedial exercises you teach that make your work with them easier, more effective and longer lasting.

2) Clothes-on Massage uses little or no oil.

**As you know, quality massage oil
is not cheap.**

**It gets into everything and is a
constant and time-consuming
chore to clean.**

**Imagine doing away with all the
mess, smell & expense.**

What a treat!

3) Clothes-on Massage saves time, no draping.

Maintaining proper draping for modesty is a constant demand and distraction.

Working only on clothed clients completely changes the dynamic between you and your clients and lets you be seen by your community as a true health care provider.

No draping means less laundry to do and no disrobing saves time between clients too.

4) Clothes-on opens up the Side-Lying Position.

**Bodies have four sides,
not just two!**

Most massage schools teach only prone and supine because in side-lying the drape so easily falls off of bare skin.

With a clothed client in side-lying, your ability to get the best results without stressing your own body is unlimited.

5) You don't have to stand all day - Take a seat!

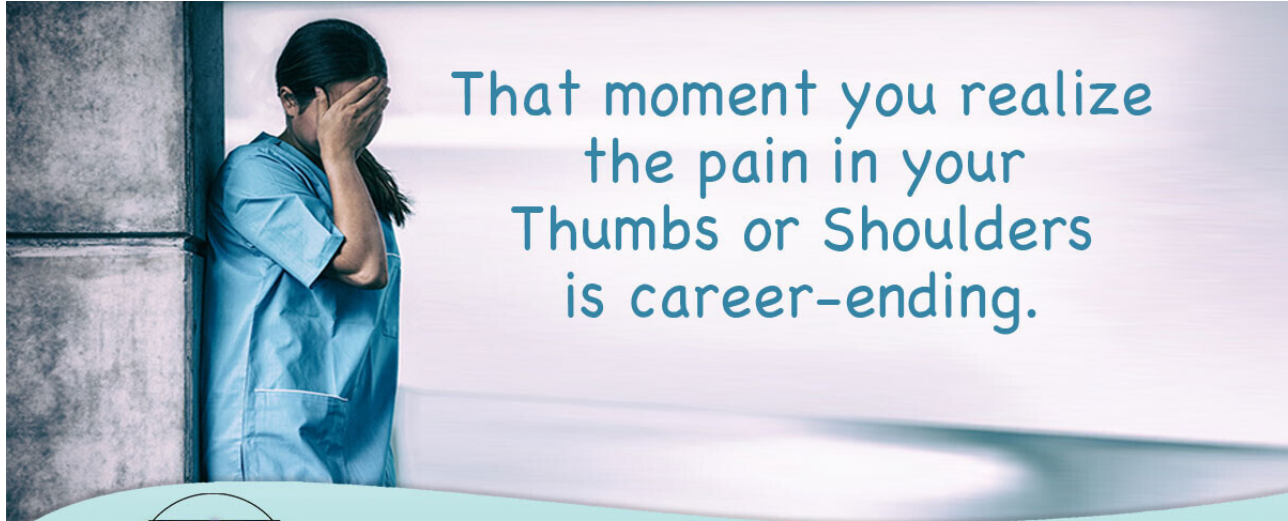

Side-lying allows you to get off your feet and come down to table height, seated on a rolling stool.

Side-lying allows more forearm work, saving your hands and wrists.

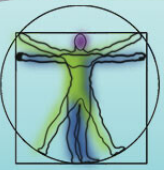

We teach Pull-not-Push techniques that reduce the repetitive stress on your shoulders and back.

Side-lying unlocks so many advantages you'll wonder why you suffered without it for so long.

Our comprehensive program shows how to clinically target your treatments for superior results, with less effort and stress on your thumbs, back, and shoulders.

That moment you realize
the pain in your
Thumbs or Shoulders
is career-ending.

THERAPYEDU.NET

We offer treatment techniques you'll won't find anywhere else, that are particularly important for mature therapists and anyone planning to do massage over the long term.

You'll learn the skills, clinical knowledge, and techniques to get referrals and work with MDs, Chiropractors, PTs, even Dentists.

Thumbsavers and Pull-not-Push Techniques Will Extend Your Career

Repetitive pushing puts a strain on your back, traps, even the infraspinatus. With a clothed, side-lying client it works really well on the extremities especially to sit beside them and use one hand to brace and your other fingers to pull.

There's no strain from having to lean in to push, you can sit comfortably with spine straight.

There's no easier way than side-lying to get your client rocking to and fro with an oscillation that works its way through the entire body.

If you've studied Tai Chi, Qigong, or Wave you'll understand how beneficial that is.

The greatest risk to your career comes from overuse injuries to your thumbs.

With all that twisting and turning, applying pressure, and side-glides it's no wonder the AMTA says most Massage Therapists burnout after just seven years.

All our students receive a set of three specially designed Thumbsavers.

We'll show how to use them to apply sustained pressure anywhere it's needed, for as long as it's needed, with no threat to your thumbs.

The wooden L-bar handle sits comfortably into the thenar eminence of your hand. In short order you'll learn how to feel it working through the pressure in your palm, with your fingers gathered comfortably at the tip.

Especially working through clothes, your clients will never know the difference.

We make the Thumbsavers ourselves and learning to use them will make a tremendous difference over the course of your massage career.

encyclopedia of clinical massage.**

Thousands of Massage Careers Transformed.

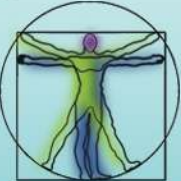

Online Masterclass and optional live One-on-One With Our Experienced Instructors:

Barbara Ollis

I started working for Chiropractors at age 16. Teaching medical massage and corrective techniques has been a great joy in my life. I am humbled by the participation of other therapists who take our classes and am motivated by them to learn new ideas and techniques.

Barbara Ollis, LMT, CNMT, MMT, MTI
Instructor for Health Matters Seminars

THERAPYEDU.NET
Health Matters Seminars

With years of experience writing research reports, performing clinical massage, and instructing, Barbara Ollis brings a wealth of knowledge and skills to enhance your practice.

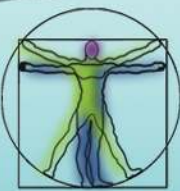

Julie Brown

I've been an LMT and business owner since 1996.

Through this program you will feel better armed in your business of doing massage, having confidence and credibility to bring in clients who are tailored to what you do best, rather than whoever walks in the door.

Julie Brown, LMT, MMT, CES
Instructor for Health Matters Seminars

THERAPYEDU.NET
Health Matters Seminars

Back in high school, Julie read medical textbooks in her spare time. Wanting more engagement with people than the short visits Doctors are typically allowed, Julie opted for Medical Massage.

Early on, Julie studied neuromuscular therapy along side of Barbara Ollis and our founder David Morin.

After 27 years as an LMT, Julie is thrilled to be now attending Med School.

As Usual, Our Students Say It Best:

Deidre Dye
Canandaigua, NY

I have always been interested in an orthopedic and pathology treatment approach to massage.

This format fits how I learn.

The videos show how to treat from different angles and I can go back anytime and review.

That is huge!

THERAPYEDU.NET

Kathyann Inniss
Edmonton, Canada

I'm really impressed how understandable this course was.

This class means a lot to me because I don't want to do massages anymore, I want to do treatments.

That is my passion. Thank you!

THERAPYEDU.NET

As Usual, Our Students Say It Best:

Jordan Spence, PT, DPT
Owner, Alevia Physical Therapy
Medford, Oregon

I believe collaboration between PT and Massage is essential for optimal patient care.

For our Massage Therapists, these wonderful courses are the path to clinical excellence that I have been looking for.

THERAPYEDU.NET

Dawn Rabideau, LMT
Wichita Falls, TX

The direction this education has propelled my practice is amazing.

Specializing in Medical Massage lets me help people with daily living and quality of life, and that is everything for me.

I feel complete!

THERAPYEDU.NET

As Usual, Our Students Say It Best:

Richard Cacal
Kailua-Kona, Hawaii

This course has impacted me in such a profound way professionally and personally.

I'm working with doctors and chiropractors because of what I have learned here.

I have gained more respect.

I've gotten a lot more referrals.

It has totally changed my business.

THERAPYEDU.NET

Erin Revels
Bentonville, AR

This class was Transformative!

The clinical, clothed-client approach will extend my longevity and set me apart from other LMT's near me.

I appreciate all the assessments, techniques, practical suggestions and helpful advice for setting up my clinical practice.

THERAPYEDU.NET

As Usual, Our Students Say It Best:

Amanda Crawford
Longmont, CO

This training saved my hands.

I've gained trust & respect
in our medical community
& constantly get referrals.

I encourage you to take
this course!

THERAPYEDU.NET

Lori Hamilton
Mission Viejo, CA

I'm 65, have osteoarthritis and
other health challenges,
but I love massage therapy.

I wanted to modify how I work
for longevity.

I wanted to learn to better
address Medical Massage.
